DENTAL ACADEMY CPD COURSE

FROM PREP TO FINISH: ANTERIOR COMPOSITE RESTORATIONS

**Speaker: Dr Nikhil Sethi, Dentist and
International Lecturer in Restorative and
Implant Dentistry**

**Date: Friday 7th June 2019,
9.00am - 4.45pm**

Cost: £215.00

OVERVIEW

Anterior composite restorations- particularly of the single central incisor- are among the hardest aesthetic procedures for a dental clinician.

While there's a focus on polishing and shaping, the whole process- from shade matching, preparation, isolation, adhesion and layering- plays an important role in a successful and long-lasting restoration.

What you'll experience

On this short course you'll cover:

- colour and the effect of dehydration on teeth and how to establish an accurate shade matching process
- how to prepare the enamel for ideal bonding
- a putty index classic technique for a simplified layering approach to recreate accurate form and aesthetics

Development Outcome: C
